

The CoGo bikeshare website, www.cogobikeshare.com/stations, features a public input tool that allows website users to suggest locations for future bikeshare stations. Users are also able to show support for suggested stations and leave comments. The map shows the locations suggested over the summer of 2014, April through July. The suggested locations are scaled according to the support each received from other users. The existing stations are shown in black.

Most Support
OSU Campus & Student Union

Support = 35
"Great for Gateway trips. Could help bring much-needed business to the area, when students without cars have an easier means of getting there for movies or grabbing dinner with friends." *User Comment*

Most Support outside of osu campus area
Parsons & Whittier

Support = 30
"A station at this location can be one way that CoGo would service a diverse socioeconomic neighborhood and be one more huge step for the Parsons Ave corridor." *User Comment*
