REZONING ANALYSIS

Section 1508 of the Smyrna Zoning Code details nine zoning review factors which must be evaluated by the Planning and Zoning Board and the Mayor and Council when considering a rezoning request. Please provide responses to the following using additional pages as necessary. **This section must be filled out by the applicant prior to submittal of the rezoning request.**

1. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property.

The surrounding properties are single family residential. This property will be attached to a previously zoned parcel which allowed for R-12 with a density of 2.78 units per acre. There is also a RAD townhome property south of this parcel.

2. Whether the zoning proposal or the use proposed will adversely affect the existing use or usability of adjacent or nearby property.

No. The existing use is for single family residential. The property has remained vacant for years so the proposed development will not adversely affect nearby properties.

3. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.

The parcel is zoned AG-1 with one vacant house on it. It is surrounded by residential subdivisions; therefore, it is unlikely it be used or developed for any use other than single family homes.

REZONING ANALYSIS (CONTINUED)

4. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.

No. The zoning request is for 19 single family homes, which will have minimal impact of the existing streets, transportations facilities, utilities, or schools.

zoning.

5. Whether the zoning proposal is in conformity with the policy and intent of the land use plan.

Yes. The requested zoning is aligned with the surrounding areas and the land use plan.

6. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.

Next to the property is train tracks, which allows for separation between this property and any other subdivision, which helps support approval for the zoning.

REZONING ANALYSIS (CONTINUED)

7. Whether the development of the property under the zoning proposal will conform to, be a detriment to or enhance the architectural standards, open space requirements and aesthetics of the general neighborhood, considering the current, historical and planned uses in the area.

O'Dwyer Properties has built several communities in Smyrna. We believe this development will enhance the architectural standards of the general area as well as highlight the entrance into the subdivision.

8. Under any proposed zoning classification, whether the use proposed may create a nuisance or is incompatible with existing uses in the area.

The zoning request is for 19 single family homes, which will have minimal impact on the existing area. The property is also next to the train track which allows space between this development and the closest subdivision.

9. Whether due to the size of the proposed use, in either land area or building height, the proposed use would affect the adjoining property, general neighborhood and other uses in the area positively or negatively.

The zoning request is for 19 single family homes, which will have minimal impact on the existing area. The property is also below the existing street level which reduces the impact based upon building height.

Architectural elevations and Floor Plan – For Rezoning Application on Cooper Rd

To City of Smyrna Planning and Development:

The purpose of this letter is to detail the architectural elevations and Floor plans we intend to build at the Cooper Rd Property. As a semi-custom homebuilder, we use a variety of building materials and techniques all focused on offering a craftsman style home for our future homeowners.

The single-family homes we will offer will be similar in design to the several previous communities completed by O'Dwyer Properties within the City of Smyrna including:

- a) Park Place**
- b) Cooper Lake Place**
- c) Tackett Farms**
- d) Maple Shade**

Some additional example elevations are shown on the following page.

Sincerely,

**Jordon Tench
